2016 - 2020

- Minor in Mathematics
- Cumulative GPA of 3.267
- Relevant Courses: Computer Networking, Web Programming, Information Systems, Search Engines, Digital Forensics

SKILLS

Proficient Skills Python, C#, Javascript, SQL, PostgreSQL, Java, git

Experience With .NET, React.js, Typescript, Django, Linux, C, C++, Flask, REST APIs

EXPERIENCE

Summer Intern - C# Developer

June 2019 - August 2019

Broadridge

Andover, MA

- Developed a multitude of .NET applications for more than 50 clients.
- Formed full stack applications using C# and SQL to meet client's financial needs.
- Regularly met with other team members to discuss UI elements, database queries, and page functionality.

Informatics Intern

May 2018 - August 2018

Waters

Milford, MA

- Authored scripts for virtual machines, updated virtual machines, and created virtual machines for testing.
- Used cloud-based software (vCloud, Azure) to run and manage machines.
- Participated in an Agile work environment that involved frequent peer-to-peer contact in the form of stand ups to review progress and decide on further actions.

PROJECTS

Record Collection Slideshow [Github](#)

React|Flask|SQL Alchemy|Node.js|Discogs API|Semantic UI

A slideshow of records I own with option to add additional records (Full Stack).

UMass Vultures [Github](#)

Django|Bootstrap

Full stack project for web development course. Posting list for providing reduced price and/or free options for students on campus at UMass.

Developer Website [Github](#)

React|Material UI|Netlify

Developer portfolio site for hosting information about me, my projects, and my resume.

LEADERSHIP

Undergraduate Course Assistant - Digital Forensics

January 2020 - May 2020

UMass Amherst

- Responsible for answering student questions both online (forum) and offline (office hours).
- Orchestrated assignments and exams for the course with other course assistants and instructor.
- Class focused on file systems, byte carving, and gathering evidence in a digital context.
