

CONOR MEADE

Full-Stack Software Developer and Data Scientist, Somerville MA

cmeade6479@gmail.com ♦ [LinkedIn](#) ♦ [Github](#)

WORK EXPERIENCE

Software Developer

August 2023 - June 2026

Endpoint Clinical

Remote

- Developed full-stack software solutions for Randomization and Trial Management (RTSM) software.
- Converted clinical trial requirements into T-SQL and ASP.NET solutions for ~200-300 trials across 15-20 drug manufacturers, ensuring compliance with patient safety protocols across randomization, dosing, and drug kit logistics.
- Leveraged AI tooling (Claude Code, GitHub Copilot) to accelerate code delivery and component generation.
- Authored and refactored T-SQL across more than 50 clinical trial databases, improving query performance and ensuring data integrity in a regulated, patient-safety-critical environment.
- Mapped database objects to Entity Framework via ASP.NET, maintaining MVC consistency across client deployments.
- Worked closely with data integration procedures (inbound and outbound) using XML and JSON.
- Coordinated study code deployment using Azure DevOps to deploy code updates to development, testing, user acceptance, and production environment.

Software Developer

March 2021 - October 2022

Navi ([Company Site](#))

Remote

- Greenfield development; built and maintained web scraping repository, used for gathering cell phone and plan promo data.
- Contributed to ETL data pipeline that would intake millions of records of web scraped data and formatted to match database schema.
- Built and optimized API endpoints in Python/Flask for serving requests for phone and plan pricing comparisons.
- Transitioned monolithic API repository into manageable microservices for user data, phone data, and session data.
- Automated CI/CD pipelines via Jenkins and GitHub Actions to run tests and accelerate deployment times.

SKILLS

Proficient With

SQL, T-SQL, Python, .NET/C#, git, Javascript/Typescript, Node.js, Azure DevOps

Experience With

AWS, React.js, Angular.js, PHP, Linux, Bash, Docker, R, Hadoop, Apache Spark

EDUCATION

Bachelor of Science in Computer Science

August 2016 - May 2020

University of Massachusetts Amherst

Amherst, MA

- Minor in Mathematics
- Relevant Courses: Computer Networking, Information Systems, Search Engines, Digital Forensics

Masters in Data Science

August 2023 - December 2026

Tufts University

Medford, MA

- Relevant Courses: Database Systems, Machine Learning, Probabilistic Systems Analysis, Big Data, Reinforcement Learning, Artificial Intelligence

PROJECTS

Multi-Agent Reinforcement Learning — Delivery Tasks | [GitHub](#) | Python

- Implemented a MAPPO system with an actor-critic architecture to train cooperative agents on pickup-and-delivery tasks; evaluated policy convergence across multiple seeds via mean/std deviation metrics in the PettingZoo environment.
